

## Join Us for a Day of Moulage Magic

The day will cover both beginning and intermediate moulage techniques to take your simulations to the next level. It is possible to make convincingly accurate representations of wounds, drainage, edema and various body fluids.

The training session will introduce the use of realistic gel effects moulage. This material works seamlessly with the human patient simulators and has proven to be an effective means of enhancing the reality of patient scenarios. We will spend the afternoon working with this amazing material. In addition to providing authenticity to the cases the moulage is so realistic it can serve as a teaching tool.

Date: Monday, July 20th, 2009  
Instructor: Becky Damazo from CSUChico  
Time: 8:30am-4:00pm  
Location: Santa Clara Valley Medical Center  
Educational Services  
2408 Clove Drive  
San Jose Ca. 95128  
Tahoe or Mariposa Classroom- TBD

Parking is available next to the building in the visitor Parking:  
Lot M and on Thornton St.

Cost: \$100 plus \$15 lab fee = Total cost \$115

The class is limited to 20 participants. Lunch will be served. To register, please contact Judy at [aa@cinhc.org](mailto:aa@cinhc.org)
